Campus Placements 2026	
Job Notification Form	
COMPANY OVERVIEW	
Name of the Company	Azisly Technologies Private Limited
Website / Other source of Information	https://azisly.ai/
Company Type	AI-Powered EdTech / Career Technology (CareerTech) Company
Brief write-up on the Company (50 to 75 words)	Azisly.ai is an AI-powered career-readiness platform focused on bridging the gap between Campus to Corporate. It empowers students and early-career professionals with intelligent tools for resume building, domain preparation, interview preparation, and AI-powered mock interviews. By combining personalized guidance, practical learning, and AI-driven feedback, Azisly.ai helps learners build the skills, confidence, and industry readiness needed to successfully transition from campus to corporate careers.
JOB PROFILE	
Job Designation	Product Designer- SDE-1
Job Description	We are looking for a Product Designer to create intuitive, accessible, and engaging digital experiences across web and mobile products. The role involves understanding user needs, translating insights into user flows, wireframes, prototypes, and polished interfaces, and collaborating closely with product, engineering, and business teams. The ideal candidate should have strong visual and interaction design fundamentals, proficiency with modern design tools, a user-centred approach, and a portfolio demonstrating thoughtful end-to-end product design work.
Place of Posting	Gurgaon
Key Responsibilities:	• Design intuitive, accessible, and visually consistent experiences for web and mobile products. • Conduct user research and translate findings into personas, journeys, user flows, and product requirements. • Create sketches, wireframes, high-fidelity interfaces, and interactive prototypes using modern design tools. • Develop and maintain reusable components, design systems, patterns, and documentation. • Plan usability tests, analyse feedback and product data, and iterate designs based on evidence. • Collaborate with product managers and engineers to assess feasibility and support accurate implementation.

	Present design rationale clearly, participate in critiques, and contribute throughout the product lifecycle.
